Experience

Senior Software Engineer — Kellton

2020 – 2025

- Led the development and implementation of high-performance, front-end solutions for Best Egg, a best-in-class fintech company, resulting in a 23% month-over-month increase in customer conversion rates. Increased customer retention by 18% and engineered innovative user interfaces for 2M+ users
- Architected solutions and transformed UIs using Angular/React/Vue/TypeScript to develop offer and refinancing features for customers which led to the client reaching \$200M in originations for the first time in company history
- Engineered inventive product offerings leading to the client ranking first in “Experience Obtaining Loan” and “Meeting Borrowing Needs” in J.D. Power’s prestigious US Consumer Lending Satisfaction study

Frontend Developer — Lazarus Naturals

2020 – 2020

- Engineered and modernized the Lazarus Naturals e-commerce site in a rapidly expanding startup in an increasingly popular wellness industry
- Collaborated with cross-functional product and design teams to deliver innovative marketing landing pages and spearheaded the development of a company-first, native app which drove an increase in sales by 24%
- Successfully launched three new product categories to the e-commerce platform, driving an increase in site traffic and customer engagement by 32% month over month

Angular Developer — Mental Health Match

2019 – 2019

- Worked alongside the CTO and CEO to implement new and refreshed application features and prototype current AWS technologies to increase therapist and customer conversion rates by 35% and improved user experience for an emerging mental health sector
- Enhanced the customized therapist platform to increase therapist onboarding by 31% for the first 3 months after product re-launch
- Optimized front-end performance by implementing lazy loading and state management patterns, reducing initial page load time by 28% and enhancing responsiveness for users seeking urgent mental health resources

Web Developer — Freelance Web Developer

2017 – 2019

- Core technologies include JavaScript/Typescript, Angular, Node.js, HTML/CSS/SCSS, AWS technologies (Lambda, API Gateway, S3), Git, Firebase and various databases and backend services
